Puppeteer • SonarQube
Unit • Integration • Vitest

Team and collaboration

Scrum • Backlog • Jira • Excel

CERTIFICATIONS

Professional Scrum Master I
ISTQB Foundation Level

EDUCATION

M.Sc. Industrial Engineering
and Management
DTU | 2019 - 2021

B.Eng. Mechanical Engineering
DTU | 2015 - 2019

Christian Volck Sinding

Software Consultant at Wivosoft

PROFILE

Software consultant with almost five years of experience developing and testing business-critical public-sector systems. I work with C#/.NET, Java and Groovy, with particular experience in system upgrades, API integrations and reliable database operations. As Team Lead and Scrum Master, I combine hands-on development with delivery coordination and stakeholder collaboration. I also build and publish my own mobile applications.

EXPERIENCE

Co-founder and Software Consultant

Wivosoft | Oct 2026 - Present | Copenhagen

Establishing a software consultancy focused on freelance development and technical delivery, drawing on experience from Netcompany.

Software Development and Test Consulting

Netcompany | Jan 2022 - Sep 2026 | Copenhagen

IT Consultant: Jan 2024 - Sep 2026

Test Consultant: Jan 2022 - Dec 2023

Domstolsstyrelsen | 2025 - 2026

- Developed C#/.NET services, upgraded .NET 8 to 10 and maintained CI/CD pipelines in Azure DevOps.
- Migrated Datafordeleren integrations from REST to GraphQL and built a mapping layer for CPR and address data.
- Improved the reliability of message delivery in C#/.NET services through database enhancements, error handling and automated testing.

Erhvervsstyrelsen | 2023 - 2025

- Developed Java/Groovy features in Grails with GSP, JavaScript and Vue, including payment and signing flows, CSV export, validation and PDF generation.
- Upgraded the Grails framework in a large application; maintained Jenkins pipelines, GitLab branching workflows and quality checks using SonarQube.

Team Lead and Scrum Master | 2024 - 2026

- Held both roles alongside development on the two projects. Facilitated Scrum events, monitored burndown charts and structured and prioritised the backlog.
- Conducted 1:1s and prepared status, billing and data reports using Jira, Excel and SQL.

Test automation and technical QA | 2022 - 2023

- Built automated E2E tests with Cypress and TestCafe, performed Gatling performance testing, and used SQL for data validation and defect analysis.

PERSONAL PROJECTS

Puppy Tracker [App Store](#)

Built and shipped an iOS app for breeders to track puppy weights, growth, feeding and litter data, using React and Supabase.

Can My Dog Eat This [App Store](#)

Built and shipped an offline iOS app with React and TypeScript, featuring food-safety information and typo-tolerant search in five languages.
